PROFILE

I am seeking a Full-Stack Web Developer role where I can apply my MERN-stack expertise to build scalable, user-focused applications. I deliver clean, maintainable code, robust APIs, and polished front-end experiences that accelerate feature development and enhance user satisfaction. With proven project experience and emerging leadership skills, I aim to contribute meaningful value while continuing to grow as a reliable and impactful developer.

WORK EXPERIENCE

Dharma App (ECOPs Case Management), Android Developer Team Lead

10/2025 – Present | Nuzvid

- Working under the guidance of Eluru SP, IPS Officer Kishore Kommi as the Android Developer Team Lead for the Dharma App (ECOPs Case Management System).
- Developed **voice-based chat assistance** for the Petition Management module, enabling officers and citizens to interact with the system using speech-to-text and AI-powered responses.
- Built a **bilingual (English/Telugu) Flutter + Firebase application** supporting real-time case tracking and workflow automation.
- Implemented **AI-driven features** including document summarization, automated case insights, and intelligent officer assistance.
- Integrated secure backend systems using **Firebase Auth, Firestore, Cloud Functions, Storage, Notifications**, and coordinated team development with proper sprint management and code reviews.

Techbuggy Pvt. Ltd., Fullstack Developer

12/2024 – Present | Remote

- Built responsive, mobile-friendly web interfaces using HTML, CSS, JavaScript, React.js, and Tailwind CSS, ensuring smooth performance across devices and browsers.
- Developed backend services using Node.js, Express.js, and MongoDB, including REST API creation, CRUD operations, authentication flows, and system integration.
- Managed version control and team collaboration using Git and GitHub with clean branching, commits, and pull request workflows.

LiveBreak, Full Stack Developer

07/2025 – Present | Remote

Sabba Farm, Freelancer

01/2025 – 05/2025

- Developed frontend and admin panel for eCommerce platform (agricultural products)
- Built with React.js, Material UI, Tailwind CSS; implemented SEO
- Ensured responsive, high-performance site across devices
- Tech Used: React.js, Material UI, Tailwind CSS, SEO, API integration

Teckzite 2k25 & Alumni Relations, RGUKT Nuzvid, Frontend Developer

01/2024 – 05/2025 | Rgukt Nuzvid

- Developed two major web applications—Teckzite25 and the College Alumni Platform—with scalable, responsive UIs using React.js and Tailwind CSS.
- Built key features like events, forms, user profiles, landing pages, and donation flows with full mobile/browser optimization.
- Collaborated on Figma-based UI/UX and implemented clean, reusable components to enhance user experience.
- Managed version control and smooth team workflows using Git and GitHub. Which handled more than 1500 users.
- Tech Stack: React.js, JavaScript, Tailwind CSS, HTML, CSS, Git, Figma

EDUCATION

B.Tech. in Computer Science and Engineering,

09/2023 – Present

Rajiv Gandhi University of Knowledge Technologies, Nuzvid

CGPA: 8.3/10

Relevant Coursework: Problem Solving Through C, OOP, Databases, Discrete Maths, Data Structures, Design and Analysis of Algorithms, Operating Systems, Computer Networks, Data Science With Python

SKILLS

Languages: C, Java, JavaScript, Python

Frontend: React.js, Tailwind CSS, Bootstrap, Redux, SEO, Flutter

Backend: Node.js, Express.js, Firebase

Computer Science Fundamentals: Computer Networks, Operating Systems, DBMS, System Design

PROJECTS

Teckzite2k25 Official Website, Built the Teckzite25 official website for the annual techno-management fest. Developed the platform using the MERN stack with UI designed in Figma. Added Google Authentication for secure user login. Integrated Razorpay for smooth event payments. Created a simple admin panel for managing events and users.

CryptoLance Website, Developed CryptoLance, a Decentralized Freelance Platform built on Web3, as part of the Onchain Summer Awards Hackathon conducted on the Devfolio platform (New User Consumer Track). Contributed extensively to non-Web3 functionalities, including designing and developing both the frontend and backend using the MERN stack, ensuring seamless user experience and robust platform features.

Sabba Farm, Developed an eCommerce platform for agricultural products as a Freelancer, including pesticides and fungicides. Developed the admin panel and main website with Razorpay payment integration, using the MERN stack, Material UI & Tailwindcss.

Alumni Website, Developed and implemented key components for the RGUKT Nuzvid Alumni Relations website, including landing page, event management, alumni directory, and donations module, improving alumni engagement and streamlining event and donor management etc using MERN Stack, and Redux state management.
